

O2H

O2H Business Analyst Fresher Assessment (3 Hours)

Business Scenario

A healthcare research company receives project requests from pharmaceutical clients through email.

Current Challenges:

- Requirements are scattered across emails and meetings.
- Project managers manually track project status in Excel.
- Clients have limited visibility into project progress.
- Delays occur because requirements are misunderstood.
- No centralized system exists for project tracking and communication.

Management wants a web-based Client Project Management Portal.

Task 1 – Requirement Gathering & Analysis (25 Marks)

Identify:

Stakeholders

Example:

- Client
- Project Manager
- Research Team
- Business Analyst
- Management

Business Problems

List at least 5.

Functional Requirements

List at least 12.

Examples:

- Client login
- Project creation
- Requirement submission
- Milestone tracking
- File sharing
- Notifications
- Approval workflow

Non-Functional Requirements

List at least 8.

Examples:

- Security
 - Availability
 - Performance
 - Scalability
 - Audit logs
 - Mobile compatibility
-

Task 2 – Gap Analysis (10 Marks)

Current Process

```
Client Email
  ↓
Project Manager
  ↓
Excel Tracking
  ↓
Research Team
  ↓
Status Update Email
  ↓
Client
```

Deliverable

Prepare a table:

Current State

Future State

Gap

Email communication Portal communication No centralized communication

Minimum 5 gaps.

Task 3 – Functional Requirement Document (FRD) (20 Marks)

Create an FRD section for:

Module:

Project Tracking

Include:

Item	Details
Module Name	
Description	
Inputs	
Business Rules	
Validation Rules	
Outputs	
Assumptions	

This directly evaluates documentation skills mentioned in the JD.

Task 4 – User Stories & Acceptance Criteria (15 Marks)

Create 5 user stories.

Example:

User Story

As a Client,

I want to view project milestones

So that I can monitor progress.

Acceptance Criteria

- User can login
 - User can view milestones
 - Status updates are visible
 - Download option available
-

Task 5 – Wireframe (10 Marks)

Design wireframes for:

Client Dashboard

Should include:

- Project List
- Milestones
- Documents
- Notifications
- Progress Tracker

Can use:

- Figma
 - Draw.io
 - PowerPoint
-

Task 6 – Agile & SDLC Questions (10 Marks)

Answer briefly:

1. Difference between Agile and Waterfall.
 2. What is a Sprint?
 3. What is a User Story?
 4. What is the role of a Business Analyst in SDLC?
 5. What is the purpose of acceptance criteria?
-

Task 7 – Data Analysis Exercise (10 Marks)

Dataset

Project Estimated Days Actual Days

A	20	24
B	30	28
C	25	35
D	40	42
E	15	18

Questions

1. Which project had the highest delay?
2. Average delay?
3. Which projects were completed ahead of schedule?
4. What insights can be shared with management?
5. Recommend 3 improvement actions.

Use Excel or Google Sheets.

Task 8 – Stakeholder Communication (Bonus – 10 Marks)

Write an email to a client requesting clarification on incomplete requirements.

This evaluates:

- Written communication
 - Professionalism
 - Attention to detail
-

Evaluation Rubric

Skill Evaluated	Marks
Requirement Gathering	25
Gap Analysis	10
FRD Documentation	20
User Stories	15
Wireframing	10
SDLC / Agile Knowledge	10
Data Analysis	10
Communication Skills	10
Total	100 + 10 Bonus

Interview Follow-up Questions

1. How would you handle conflicting stakeholder requirements?
2. How do you prioritize requirements?
3. What sections should an FRD contain?
4. Difference between BRD and FRD?
5. What would you do if developers misunderstood a requirement?
6. How would you estimate project scope during pre-sales?
7. How do you manage stakeholder expectations?
8. How would you improve the proposed solution?

This assessment closely matches the o2h JD because it tests the exact activities mentioned: **requirement gathering, FRD creation, user stories, wireframing, gap analysis, stakeholder communication, project discussions, and analytical thinking** rather than only theoretical BA knowledge
