

Client Project Management Portal

User Stories and Acceptance Criteria

Prepared By:Nanthini P

ID	User Story	Acceptance Criteria
US01	As a Client, I want to login into the portal so that I can access my project information.	User should enter valid username and password. Login should be successful.
US02	As a Client,I want to view project milestones so that I can monitor projects progress.	User can view milestones details.Progress status should be displayed.

US03	As a Project Manager,I want to create projects so that I can assign work to the research team.	Project creation option should be available. Project details should be saved.
US04	As a Research Team member, I want to update project status so that stakeholders know the current progress.	User can update status.Updated status should be visible to clients.
US05	As a Client,I want to download project documents so that I can revie reports.	Download option should be available. Only authorized users can access files.

Purpose of User Stories :

User stories define system requirements from the perspective of different users. Acceptance criteria define the conditions required to confirm successful implementation of each requirement.
